**Ancestral Repatterning:
Tracing the Origins of Your Illness**

with Laura Aversano

Fee \$40 Pre-register by email: info@albertsonchurch.org

Come and join author and Medical Intuitive Laura Aversano as she delves deeply into patterns and imprints that have impacted people's lives on a daily basis. Through her 20 years of practice, Laura has been able to ascertain origins of illness with clients which are encoded in our spiritual genetics even before we are born.

Laura will work with a few audience members, connecting with the spirit world as she expands the frequencies already present with those who volunteer and in the room. She retrieves insight to help all participants better understand how to palpate the world around them and what lies within. She'll give examples of how she tracks conditions of all kinds whether they are physical, emotional or spiritual in nature. As Laura expands the energies present as the spiritual process unfolds, class members participate by experiencing them and offering and receiving feedback and support. This becomes part of an individual and collective ancestral healing which we explore in group consciousness. It also provides a unique opportunity to more fully experience the process of multi-dimensional transformation. Laura's website: www.LauraAversano.com

Please be aware that this workshop requires a minimum number of students, if you are interested in this class you must pre-register by emailing us at info@albertsonchurch.org stating the name and date of this workshop.
